## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 21 is objected to because of the following informalities: a) "and the therefore second fill material'" in claim 21 is grammatically awkward because the addition of "therefore" is inappropriate. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21-27 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: between the casting drum/ ribbon rollers combination and the encapsulation region/ injection wedge/ means for holding and pumping combination. Claim 21 does not clearly provide the structural relationship between the two combinations of units. Suggestion include changing "a plurality of movable dies cooperatively forming an encapsulation region" to --a plurality of movable dies accepting the transported ribbons to cooperatively form an encapsulation region--.

Art Unit: 1722

### ***Response to Arguments***

4. Applicant's arguments filed 7/25/05 have been fully considered but they are not fully persuasive.

Firstly, the 112 2<sup>nd</sup> rejections of indefiniteness have been overcome by the Applicant's amendments. Furthermore, the double patenting rejection over 6,884,060 has been withdrawn. The Examiner notes that the combination of the valved injection wedge in combination with the encapsulation region is novel over the prior art and is not taught by Schonmann as discussed by the applicant.

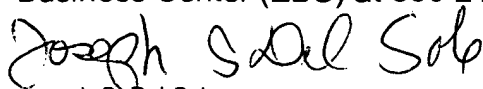

However, the Examiner finds the new addition to claim 21 line 13 objectionable as stated above and finds that the independent claim still lacks necessary nexus between the units in their entirety as discussed above.
